## WILDALP

A MOMENT OF PURENESS

# 888

## A MOMENT OF PURE PERFECTION RISES FROM A NATURAL SPRING

Wildalp is a pure and natural spring water whose **premium quality** is based on the purity of its source.

Our Karst water flows through underground streams and levels of terrain untouched by human hands and is thereby filtered by different layers of rock of the limestone alps.

In order to preserve **the purity of the spring water**, the water is bottled directly at the source with great care, allowing it to maintain its origin, its natural energy and the special character it has developed along its long journey.

Our spring is situated in an **historical water protection** area already used by Emperor Franz Joseph for the „Wiener Hochquellwasserleitung“ (water supply pipeline to Vienna) at the turn of the century and ranks among 7 springs in the Hochschwab region.

Wildalp, therefore, originates from unspoilt nature, has a unique balance of minerals as well as a high content of natural oxygen, low sodium content, which makes it the epitome of soothing, refreshing and natural spring water. – A MOMENT OF PURENESS!

# WILDALP

**WILDALP IS INTENDED FOR THE HEALTH-CONSCIOUS, NATURE-ORIENTED AND QUALITY-CONSCIOUS CONSUMER WHO IS PREPARED TO PAY THE APPROPRIATE PRICE FOR THE HIGH QUALITY THEY EXPECT.**

**Wildalp is an extraordinary provider of premium spring water which takes up a particular market position due to its pure water quality, its content and its naturalness. Our water originates from the heart of the Styrian Alps. A unique water protection area guarantees the naturalness of the region and the purity of the water.**

The focus of our efforts is the human being. On the one hand the company is thriving and growing through its employees and on the other hand the key to our success is in the hands of our satisfied and

enthusiastic customers (consumers). For this reason we take social and entrepreneurial responsibility very seriously and act with trust, respect, reliability, honesty and open communication.

On our search for perfection, we develop a passion for outstanding quality and the love of nature in the sense of a long-term build-up of values and sustainability. We act with professional competence, innovation as well as flexibility and handle our resources in a responsible way.

# A SOURCE OF LIFE

**WILDALP ALPINE SPRING WATER –  
UNTOUCHED BY HUMANS – FILTERED  
NATURALLY THROUGH VARIOUS  
ROCK STRATA OF THE LIMESTONE ALPS.**

Water means life; the organism cannot function without water. It regulates all the functions of our body and our consciousness and renders thinking processes possible.

Drinking water regularly stimulates the metabolism which enables the purification and detoxification of the body and positively affects the elimination process. Water is only in its purest, untreated form with a pH value of over 7.4 (basic, alkaline) suited for the permanent consumption. **Pure and natural water** does not only purge the body of impurities, but also tastes neutral and even at room temperature, it feels cool and refreshing – thus a living water.

The nutritional trend is clearly moving towards high-quality food which has been cultivated as naturally as possible and is marked by a shift from instant meals to freshly processed food. An increasing number of people realize how important a substantial nutrition is for their health. This includes a pure and natural water for **sufficient and regular hydration.**

**Wildalp Alpine Spring Water helps to keep your body vital and healthy.**

## INGREDIENTS\*

|                   |          |
|-------------------|----------|
| pH value          | 8        |
| Oxygen            | 9.2 mg/l |
| Sodium            | 2.0 mg/l |
| Calcium           | 45 mg/l  |
| Magnesium         | 13 mg/l  |
| Hydrogencarbonate | 170 mg/l |
| Potassium         | 1 mg/l   |
| Chloride          | 2.6 mg/l |
